

Folk recommendations from user test round 1

These changes are applied to take to user test round 2

Screen	Changes	Status
Urgent Care Clinic Details Page	Moving the UCC screener from 'assessment' to BEFORE the UCC details page, right after they tap on a UCC card --- Reason for BEFORE: Not every UCC clinic can book online if it is on disposition page that they make the choice.. it maybe pre-mature because their choice would also factor in proximity, booking availability	Done. Signed off  Mobile - Care Options Prototype User Test Round 2 Changes tap on ucc cards to view flow
Assessment: Request for postcode question	Editing the Postcode intro copy in Assessment from "recommended services" to ensure this is setting the right expectations. Agreed copy: Me: For us to tailor the available healthcare service options, please tell us your location. Else: For us to tailor the available healthcare service options, please tell us their location.	Done. Signed off
SC Disposition and Care Options Recommendation Page > ALL DISPOSITIONS	Altering the "What to do" copy on the disposition page to help guide decision making and prioritise service options.	1. Alison came up with concept and wrote a draft. 2. Discussed outline of this with Lizzie and Kath. 3. Lizzie has inserted draft for team to better visualise  @Kathleen Carpenter @Alison Woods @Yuanee Wickramasinghe Team to collaborate To work with Folk the 25th week to finalise copy. Folk offers to insert text For care options: Refer to component here:  Mobile - C

		are Options Prototype User Te st Round 2 Changes
SC Disposition and Care Options Recommendation Page > ALL DISPOSITIONS > Learn more (about care options)	To decide if we want to keep this in Example symptoms Abdominal pain, vomiting, urinary tract infection and respiratory illness.	☒ @Alison Woods @Kathleen Carpenter @Yuanee Wickramasinghe Team to work with Clinical team to decide if we want to have example symptoms because this confused the users. i.e. they were looking for symptoms they inputted
SC Disposition and Care Options Recommendation Page > seek urgent care	Moving the "Find a service" widget from the bottom of the page the "What do to" section of the "Seek Urgent Care" page. This is to align the page structure with the service seeking mental model of users who just want to be told what to do and find help. The SMS link moved to bottom of page	Done. Signed off But @Jo Fegan and @Kathleen Carpenter decided to have sms me a link to this page at the bottom
SC Disposition and Care Options Recommendation Page > ALL DISPOSITIONS	Re-style sms me a link to this page and place this at the bottom of the page	Done. Signed off
SC Disposition and Care Options Recommendation Page > ALL DISPOSITIONS	Add the reference number notice at the bottom	Done. Signed off
SC Disposition and Care Options Recommendation Page > See a GP in 2 hours	Add "More information" header to the following content: <i>Call the healthdirect helpline on 1800 022 222 to speak to a nurse if any of the following apply:</i> <i>their symptoms get worse before they see a doctor</i> <i>they can't access any of the above services</i> <i>they are worried</i> <i>More information about their symptoms and related topics is available in these healthdirect articles:</i> <i>Swollen glands</i> <i>Sore throat</i>	Done. Signed off  Mobile - Care Options Proto type User Test Round 2 Chang es
SC Disposition and Care Options Recommendation Page > ALL > Health articles	More information about their symptoms and related topics is available in these healthdirect articles: Swollen glands Sore throat	@Alison Woods has worked on concept of copy Lizzie has inserted draft ☒ Team to discuss with the wider team
Service Finder Results Cards page	Noting that it may not be technically feasible, users highlighted a desire for a "distance from me" filter	Designed but need feedback from tech team.

	within the service finder, wanting to look for services within 10km, 20km, 50km etc. --- Context: Jo: for UCC search the system applies a certain radius based on postcode. There's like 7 brackets, metro being 20km up to very remote being 300km. If somehow the postcode was unknown the system would search 100km. Perhaps we extend that logic to SF UI? The table is in the Lucidchart doc under the urgent care tab if you're interested in specifics Lizzie: system should be smart enough to identify postcode and adjust accordingly. if metro = default 20. If regional default = 300	☐ Kathleen to check with @Bruc Liong ☒ Lizzie checked with Paramesh on 2nd april. Suggested keeping 50km to as wide as possible distance search but provide user filter options see how they respond to that  Mobile - Care Options Prototype User Test Round 2 Changes
SMS validation	Microcopy needs to be shorten An SMS with your Symptom Checker responses and result has been sent to the phone number provided. Please check your messages and follow the instructions.	☒ @Alison Woods Microcopy needs to be shorten  Mobile - Care Options Prototype User Test Round 2 Changes
